Are you prepared for success? Getting qualified by attending our district ropings is the key to being successful at each district's finals as well as Association Finals. Enter in as many categories as you can to give yourself the best chance at winning prizes and earning points! So many times we see people who really have things going their way at Finals but aren't qualified in more than one or two categories so their chances for winning the truck are lost because they didn't rope up through all the categories in the district ropings during the regular season. You lower numbered ropers should always take the advantage of roping in higher numbered ropings...it gives you the chance to match up with better ropers which increases your chance of winning! For sure, everyone needs to have fun and rope with your friends that you practice with and compete all the time with, because certainly, that level of comfort keeps you confident. But why not make some new friends at the ropings, enter those higher categories and enjoy the excitement of pushing yourself to the next level?! Give yourself the best odds at winning – and make your plan and get to Abilene in July! The truck is waiting for someone to drive it home!!

All our Best to All of You!
